## **ABSTRACT**

The main aim of developing "Farm Management System Project" application is to help farmers by providing all kinds agriculture related information in the site. "Farm Management System Project" is web application which helps farmers to share best-practice farming processes. It helps farmers to improve their productivity and profitability. It enables farmers to sell their products online and farmers can purchase tools and seeds directly from seller. Farmers can view their profile and they can register, edit and delete data.

The farmers can sell their productions online and the buyer can purchase various agricultural products online. Buyer can send purchase request to check the quality of the Agro product through mails
